

**MESA CONSOLIDATED WATER DISTRICT  
DIRECTOR, DIVISION 2**

**BOB OOTEN**

**OCCUPATION:** Professional Engineer/Water Systems Manager

Name: Robert J. Ooten, Professional Engineer.

Age: 63.

Occupation: Water Resources Engineer.

My 30 years of board experiences include President and Treasurer of the local and state California Water Environment Association, President of Southern California Energy Coalition, and treasurer of a homeowners association combined with forty years of experience in the water field doing water resources planning, design, and contract administration and as a water systems manager, I am well qualified to represent you.

With a Masters Degree in Environmental Engineering and a Bachelors Degree in Civil Engineering, I have spent the past 23 years operating water purification systems for 2,300,000 people in Orange County. I am currently involved with researching new water conservation technologies that will extend water supplies and reduce beach pollution.

Retiring in 2005, I will energetically take time to study District plans, policies, budgets, and proposals to make good choices for our community.

I am committed, proactive, ethical, and a team player who will work hard to protect our environment and provide a safe and low cost water system. My wife and I are 20-year Costa Mesa residents. Our daughter is an experienced Water Resources Engineer serving as a Water Board Director.
